
Using Shepard's® Citation Service on Lexis

How to *Shepardize*™ a Case in Lexis+®

The most common use for the *Shepard's* Citations Services is determining if a case is “Good Law,” valid and citable. This process is referred to as *Shepardizing*.

Shepard's provides a comprehensive report of the cases, statutes, secondary sources, and annotations that cite your document, including more recent cases that rely on your starting case.

Shepardizing: Running the report

Retrieving a *Shepard's* report for your case can be done in various ways.

1. **Shep: enter your citation directly into Lexis**

The easiest way to *Shepardize* a document if you know its citation is to simply enter “shep:” followed by the citation, and click on the search button as shown.

For example:

Enter **Shep: 800 F.2d 111**

What would you like to research today?

shep:800 F.2d 111

All Content All Jurisdictions

The *Shepard's* report will display.

2. Preview pane within case view

If you already are looking at your case in *Lexis*, the case will have a *Shepard's* signal by the title that gives you an immediate indication of its precedential value. In the example case, the red stop sign shape indicates that this case has been overturned on at least one legal issue. Hover over any *Shepard's* signal to see a short definition.

You can also detect possible issues in the *Shepard's* preview pane visible on the right side of the page.

The screenshot shows the Lexis+ interface for the case **McNeil v. Econs. Lab.**. The breadcrumb trail indicates it is from the 7th Circuit Court of Appeals, decided on August 27, 1986, with citation 800 F.2d 111. The interface includes a navigation menu on the left with options: Top of Document, Disposition, Case Summary, Headnotes, Counsel, Judges, Opinion, and Footnotes. The main content area displays the case title, a search icon, and a 'Copy Citation' button. Below this, it lists the court (United States Court of Appeals for the Seventh Circuit), dates (February 13, 1986, Argued; August 27, 1986, Decided; August 29, 1986, Filed), and case numbers (Nos. 85-1332, 85-1398). The 'Reporter' section provides the citation: 800 F.2d 111 * | 1986 U.S. App. LEXIS 29174 ** | 41 Fair Empl. Prac. Cas. (BNA) 1789 | 41 Empl. Prac. Dec. (CCH) P36,492. The 'Prior History' section notes: [**1] Appeals from the United States District Court for the Northern District of Illinois, Western Division, No. 81 C 20150 - Stanley J. Roszkowski, Judge. The 'Disposition' is AFFIRMED.

Once you click on the signal indicator, the full *Shepard's* report will display with details on each citing decision.

Alternatively, click on “*Shepardize* document” in the preview pane.

Anatomy of the Report

The screenshot shows the Lexis+ interface for a case analysis. At the top, the Lexis+ logo and search bar are visible, along with user information (Client: None) and navigation links (History, Help). The main header displays the case name "McNeil v. Economics Laboratory, Inc..." and its citation "7th Cir. Ill. August 27, 1986". Below this, a navigation bar highlights "Citing Decisions 132" with other options like "Document", "Other Citing Sources 62", "History 5", and "Table Of Auth".

The central area is titled "Shepard's® Citing Decisions Analysis" and features a bar chart showing the distribution of analysis results across various courts. A red box with the text "Filters to focus your research" has arrows pointing to the "FILTERS" sidebar on the left. This sidebar includes a search box and several filter categories: "Analysis" (Warning: 1, Questioned: 1, Caution: 6, Positive: 10, Neutral: 5, "Cited by": 112), "Court", "Agency Decisions", "Publication S", "Discussion", "Headnotes", and "Timeline".

Below the chart, a "Sort by" dropdown menu is open, showing options: "Analysis (Red to Blue)", "Discussion (High to Low)", "Court (Highest to Lowest)", and "Date (Newest to Oldest)". A red box with the text "Sort options" has an arrow pointing to this menu. Another red box highlights the "Sort by" section of the "Display Settings" panel at the bottom right, which mirrors the options in the dropdown menu.

Analysis Category	Count
Warning	1
Questioned	1
Caution	6
Positive	10
Neutral	5
"Cited by"	112

Report Categories

The *Shepard's* Report displays results in **four** categories with links to each appearing on the top left pane, each containing valuable information about the document you *Shepardized*: Citing Decisions, Other Citing Sources, History, and Table of Authorities. “Document” takes you back to the case you are *Shepardizing*.

This article primarily covers “Citing Decisions” since those primarily affect the precedential value of the case. The other categories include:

Other Citing Sources: Secondary sources and statutes citing your case. You can focus this down to include statutes, law reviews, treatises, and/or court filings. *Search within Results* allows you to narrow your search results to terms of interest. For statutes, these also include related regulations.

History: the previous and subsequent history of the specific case you are *Shepardizing*. For statutes, this is the history of the passage and amendment of the statute.

Table of Authorities: Lists all cases, statutes, etc., cited within the specific case you are *Shepardizing*.

“Narrow by” Pane: Filter your results

While viewing “Citing Decisions,” you can enter additional search terms, or use various tools:

Narrow by

Click the any filter clear

Add any desired filters to narrow by date, jurisdiction, etc.

When looking at the search results with any options, the current filters appear at the top of the results panel. To remove these filters and go back to the full set, click a the filter to dismiss it or “Clear” to dismiss them all.

To narrow by more than one category under a filter, click on Select Multiple, select the checkboxes for the categories you want to narrow your results to, and select OK.

Note: Each time you narrow your results, the results are cumulative. For example, you can narrow your results to cases, then to a specific time line within those cases, and then to a specific jurisdiction or court within those cases in the timeline.

Discussion:

Discussion refers to how much detail the case goes into when discussing your *Shepardized* case. In our example case, we can see that most cases only cited it, while 13 mentioned it specifically, and nine discussed it in depth. Those nine may be the most helpful in your research.

Headnotes:

Another useful tool is the ability to focus by headnote, to find cases that only discuss the specific issue you need.

When you *Shepardize* your case you may find a long list of cases that cite to your decision. In our example case, there are 132.

With Lexis headnotes you can identify when a citing case discusses an issue similar to one or more of the Lexis headnotes of the case you Shepardized.

In the headnotes box, the number indicates how many times each *Lexis* headnote from your *Shepardized* document is identified to a citing case within this report.

The links indicate which headnotes are referenced in each document. Resting the cursor on a headnote displays the topic of the headnote.

Shepard's for Statutes

The *Shepard's* service also covers statutes. For the most part, the tools work the same way. You can either type "Shep:" and then the citation, or navigate to the *Shepard's* report from the text of the statute itself.

Court treatment of subsections

One important difference in the reports: Instead of headnotes, the statutes offer a way to view reports focused on a subsection of the statute. Clicking the link brings up a list of available reports based on courts commenting on a single section or a related set of sections, which is very helpful when a statute is lengthy and discusses several discrete topics.

Delivering your report

Each report category has options that let you save, print, download and email your report. Just above the first case in the report, you will find icons for Folder (not active in the Law Library), Print, Email, and Download. Click on the icon of choice.

Print: Choose whether you want to print a single document, or print the results list.

To print the results list: while viewing your results list, select the specific results you want to print. If you do not make a selection, it will default to printing all cases. To print a single document: while viewing the results list, open the specific document you want to print.

Email and Download: The controls are very similar to the Print controls. One difference is that in those two options, you can choose between PDF, Word, or Word Perfect format.

Shepard's Signal™ Indicators

The *Shepard's* Signal indicators are integrated into case law documents and provide an immediate indication of the subsequent history and treatment of a particular case. When these codes are present, the *Shepard's* research service displays one of the following signals:

	Warning: Negative treatment is indicated. The red Shepard's Signal indicator indicates that citing references in the Shepard's® Citations Service contain strong negative history or treatment of your case (for example, overruled by or reversed).
	Warning: Negative treatment is indicated for statute. The red exclamation point Shepard's Signal indicator indicates that citing references in the Shepard's Citations Service contain strong negative treatment of the <u>Shepardized</u> ™ section (for example, the section may have been found to be unconstitutional or void).
	Questioned: Validity questioned by citing references. The orange Shepard's Signal indicator indicates that the citing references in the Shepard's Citations Service contain treatment that questions the continuing validity or precedential value of your case because of intervening circumstances, including judicial or legislative overruling.
	Caution: Possible negative treatment indicated. The yellow Shepard's Signal indicator indicates that citing references in the Shepard's Citations Service contain history or treatment that may have a significant negative impact on your case (for example, limited or criticized by).
	Positive: Positive treatment indicated. The green Shepard's Signal indicator indicates that citing references in the Shepard's Citations Service contain history or treatment that has a positive impact on your case (for example, "affirmed" or "followed by").
	Citing references with analysis available: The blue "A" Shepard's Signal indicator indicates that citing references in the Shepard's Citations Service contain treatment of your case that is neither positive nor negative (for example, explained).

For statutes, you may also see a warning that pending legislation may change the statute if passed:

For more details about what the different signals mean, read "[Shepard's® Signal indicators and treatments](https://www.lexisnexis.com/pdf/lexis-advance/Shepards-Signal-Indicators-and-analysis-phrases-Final.pdf) (https://www.lexisnexis.com/pdf/lexis-advance/Shepards-Signal-Indicators-and-analysis-phrases-Final.pdf)," from LexisNexis.
